

CDWaste-ManageVET

Developing VET for addressing Construction and Demolition Waste Management skills needs

Co-funded by the
Erasmus+ Programme
of the European Union

Newsletter n°1

The construction sector is the largest producer of waste in Europe: Construction and Demolition Waste (CDW) represent the largest volume of waste generated in the EU.

The European Protocol for the Treatment of CDW was set up to enable Member States to progress in the management of CDW as resources to be reused and recycled in a circular economy approach (2020 target: 70% CDW recovered). In this context, the Erasmus+ project "CDWaste-ManageVET" launched in October 2019, aims at developing a Vocational Education and Training programme, that meets the training needs related to the effective management of CDW in accordance with EU priorities and the EU strategy for a circular economy.

Actions to be implemented during the project (10/19-01/22):

- 1) Industry Driven Analysis and Best Practice handbook
- 2) Development of the CDWaste-ManageVET curricula with a stimulated Work Based Learning component.
- 3) Development of the CDWaste-ManageVET on-line training platform
- 4) Pilot testing of CDWaste-ManageVET Programme and platform
- 5) Dissemination activities and exploitation of results

Project No of Reference: 2019-1-FR01-KA202-062962

CDWaste-ManageVET is a project co-funded by the Erasmus+ Programme of the EU, in the framework of the Key Action 2: Cooperation for innovation and the exchange of good practices, supporting the Strategic Partnerships for vocational education and training.

Project news and Progress

The first phase of the project is devoted to the development of the mapping of skills needs and a best practice handbook.

Desk research analysis along with field research activities took place in all countries involved, in order to investigate the status quo concerning CDW policies and legislative frameworks in national context, along with identifying skill gaps and training needs towards CDW management and a circular economy.

All the comparative results were consolidated in a transnational report, identifying the main conclusions reached towards CDW management training needs in a European level!

Project partners:

CDWaste-ManageVET partnership involves 7 partners coming from 6 EU countries, representing the public and private sector, in the fields of sustainable development and training.

OEC | FRANCE (Project Coordinator)
OFFICE DE L' ENVIRONNEMENT SE LA CORSE
Regional Public body

PEDMEDE | GREECE
PANHELLENIC ASSOCIATION OF ENGINEERS
CONTRACTORS OF PUBLIC WORKS
Social partner representing the construction sector

EKS | GREECE
EUROPEAN KNOWLEDGE SPOT
NGO

FORMEDIL | ITALY
FORMEDIL ENTE NAZIONALE PER LA
FORMAZIONE E L'ADDESTRAMENTO
PROFESSIONALE NELL'EDILIZIA
National paritarian organization for VET

ISQ | PORTUGAL
INSTITUTO DE SOLDADURA E QUALIDADE
Engineering, Research Institute & VET Centre

UPB | ROMANIA
UNIVERSITATEA POLITEHNICA DIN BUCURESTI
Higher education institution

FLC | SPAIN
FUNDACION LABORAL DE LA CONSTRUCCION
Foundation & VET Centre
